Comments:

- This report does NOT represent the final figures for YTD through September 2022. It represents what was in MUNIS at the time of this report (9.29.2022)
- Most Revenues received in Jan-Feb are for services/expenses from prior year, & are moved back (to 2021). Thus, current year revenues are delayed.

NOTEWORTHY ITEMS, UPDATES AND ACCOMPLISHMENTS

- We welcomed Sarah Centerwall as our new Early Intervention Service Coordinator, and Shane Healy our intern, who will be with us through the spring of 2023.
- We celebrated Tioga County's Employee Recognition Week, recognizing Heather Vroman, Dr. John Sarnicola, Kylie Holochak and Mark Griep for their years of service. Kylie welcomed her new baby boy!
- We held a back to school immunization clinic for students. Thank you to our MRC volunteer nurse Nancy Kemp for being so willing to help!
- At various stages of addressing program and grant desk audits and onsite survey. A representative from the State Bureau of Water Supply and Protection, State Department of Health, and Dan completed a capacity development audit on the Village of Waverly water supply, part of a pilot program Waverly was chosen to participate in.
- We held our rabies clinic at Rawley Park in Richford and vaccinated almost 100 pets.
- Todd attended the County Environmental Health Director conference and Dan attended the Central New York Environmental Health Water Symposium.
- Dan assisted our County Safety Officer in testing drinking fountains at the County Office Building located at 56 Main Street and Health & Human Services, and did secondary testing in certain areas.
- We hosted a Child Safety Seat Check Event in our parking lot, here at Health and Human Services. Health Educators also assisted with Car Fit & Child Passenger Seat check event in Broome County
- Health Educators distributed/advertised several messages on the importance of immunizations. Laura and Angel distributed lead posters, ice packs and immunization information to clinics in the county.
- Assisted Personnel in setting up Flu vaccine clinic for Tioga County employees in conjunction with Walgreens, unfortunately event did not occur due to lack of attendees.
- Ongoing canvassing for Nurse and P/T Dentist.
- The Dental Van has returned to the Waverly School District to start the 22/23 school year. Numbers have doubled at the MS/HS since last year. Dentist appointments booked through December.
- Governor Hochul declared poliovirus emergency disaster in New York State. We created educational flyer and distributed through community.
- Ongoing support/partnership in: Team Tioga, Safe Harbor Committee, Allies in Substance Abuse Prevention (ASAP), Tioga County Immunization Coalition, Anti-Hunger Task Force, Tioga County Local Emergency Planning Committee (LEPC), Child Fatality Review Team, Care Compass Network PAC Executive Council, Tioga County Council of Governments, Board of Health, Rural Economic Partnership (REAP), and External Community Advisory Board MPH Program at Binghamton University, Immunization Action Plan Coalition, and Lead Poisoning Prevention Program (LPPP) Coalition.

Continuing with COVID-19

- As of September 21, 2022; since March 14, 2020 onset:

New York State	National
Total Known Cases: 6,245, 449	Total Known Cases: 95,832, 283
Total Known Deaths: 71, 943	Total Known Deaths: 1,054,647
Total Known Recoveries: 6,122,032	Total Known Recoveries: 94,152, 770

- Current Numbers To Date; since March 14, 2020 onset:
 - **922** Days Since Public Health EOC activated (3/14/2020)
 - **13,356** Confirmed Cases (Data from NYS CommCare system)
 - **20,869** Quarantine/ Isolation Orders Issued (Data from NYS CommCare system)
 - **4,324** Household Trips/Deliveries
 - **186** Complaints
 - **4,078** Facebook Likes
 - **1,116** Facebook Posts
 - **56** Media Interviews
 - **143** Press Releases

Allocation of Expenses
Year-to-date through September 2022*1,3

- *Notes:
1. The "Financial Snapshot" & "Allocation of Expenses" represent figures as of this report date (9/26/2022), and are not the FINAL September 2022 figures.
 2. During 2020, the Legislature required a 10% cut in expenses from all County departments. This was removed from the Expense side of the ledger, but not the offsetting revenue portion, thus inflating the reported "Local Share" of Public Health by nearly \$375K.
 3. COVID Specific funds have been removed from these tables, as they skew the numbers due to their large amounts. Currently over \$2.6 million has been appropriated of Covid funding within Public Health.

Guest Column: Back to school safety

Submitted by Tioga County Public Health

September is here, and soon students will be making their way back to classrooms. Tioga County Public Health

recommends the following safety tips so everyone can have a safe and healthy school year:

Walking to School Safely

- Be visible at all times – wear bright colored clothing or reflective materials

- Use sidewalks if available; if not available, walk facing traffic and as far from traffic as possible.

- Children under 10 years old should be accompanied by someone who will make sure they are safe.

- Whenever possible, cross streets at crosswalks or intersections.

- o If not available, locate a well-lit area with the best view of traffic, and wait for a gap in traffic that allows enough time to cross safely. Continue watching for traffic while crossing.

- Never assume a driver is paying attention – make eye contact with drivers as they approach.

- Watch for cars entering or exiting driveways, backing up in parking lots, and turning.

Biking to School Safely

- Always wear a helmet that fits properly. Securely fasten the chin strap.

- Ride in the same direction as traffic. Follow traffic signs and signals.

- Stay in the bike lane whenever possible. Use the sidewalk appropriately and keep an eye out

for others.

- Choose the safest bike route from home to school.

- Don't use electronics while riding – it's important to keep eyes and ears on the road.

School Bus Safety

- Students are 70 times more likely to get to school safely when taking a school bus instead of traveling by car.

- Wait for the bus to come to a complete stop, for the door to open, and for the driver to say it's okay before approaching the bus door.

- Never walk behind a school bus. If necessary, cross the street, walk on a sidewalk or along the side of the street to a place at least 5 giant steps (10 feet) in front of the bus before crossing.

Immunizations

- Make sure children are up-to-date on their vaccinations before they go back to school.

- Immunizations are a safe and effective way to protect everyone from communicable diseases.

Rethinking "Stranger Danger"

- "Stranger danger" ignores that fact that most children are abducted by someone they know.

- When talking about abduction

prevention, don't focus on warning about certain types of people; instead, teach identifying and responding to threatening situations.

- o For example, instead of saying, "Stay away from people you don't know," say "It's important for you to

get my permission before going anywhere with anyone."

After a disaster, many others in your community need help as well. For this reason, local first responders and other assistance may not be able to reach you right away. The Federal Emergency Management Agency (FEMA) Ready campaign recommends these steps to prepare for emergencies.

Step 1: Know Your Risks

Being prepared requires knowing what to prepare for. Make note of disasters, emergencies, or hazards that have affected you or your property the most, and take the appropriate steps to prepare yourself, your home, and your household. You can find hazard specific information sheets at <https://www.ready.gov/be-informed>.

Step 2: Make a Plan

Now that you have identified risks, it is time to start planning. You should take a few important steps. First, create a Family Emergency Communication Plan and Evacuation/Shelter Plan. To help you get started, visit <https://www.ready.gov/plan>. You should also prepare critical documents, like household identification, financial and legal documents, and medical information and proof of insurance. One

of the most important parts of being prepared is to have emergency supply kits available at home, at your workplace, and in your vehicle. A full list of supplies can be found at <https://www.ready.gov/kit>, and include things like water, food, cash, a flashlight and extra batteries, and a first aid kit.

Step 3: Take Action

There are several actions that you can take now to prepare yourself, your property, and your household for a disaster. Make sure you practice your disaster plan with your family or household, review and make changes (if necessary) to your insurance coverage, and stay informed with emergency warnings and alerts.

It doesn't take much to be prepared for a disaster or emergency, and it can make all the difference. Start preparing now by checking out the information below!

- <https://www.tiogacountyny.gov/departments/public-health/>

- Facebook: @Tioga County Public Health

- <https://www.redcross.org/get-help/how-to-prepare-for-emergencies.html>

- <https://www.ready.gov/>

Candor Chronicle 9/20/22

September is National Preparedness Month

National Preparedness Month is observed each September to highlight the importance of preparing for disasters and emergencies that could happen at any time. Disasters disrupt thousands of lives every year, leaving behind lasting effects on people and property.

Guest Column: Age is only a number

Submitted by the Tioga County Health Department

You may not act your age, but you should celebrate your age.

It's true, age is only a number but, as you age you need to be mindful about things you do so you can continue living a happy, healthy life.

Several things affect the way we age, including family history, medical status, and diet.

By the year 2030 1 in 5 adults are projected to be 65 years or older.

According to the 2020 census data, older adults account for 21.5% of Tioga County's population.

With an aging population there is an increased need for healthcare, long-term care, social services, and other resources that support adults as they age.

Current resources for older adults in Tioga County include, but are not limited to, programs offered through Tioga Opportunities, Tioga County Department of Social Services, and Tioga County Public Health.

Examples of available services include congregate dining and home delivered meals, programs and activities for older adults, protective services, long term care services, and free home safety checks.

Follow these tips to help promote healthy aging:

• Exercise. Exercise can be as simple as walking just ten or fifteen minutes, three to four times a week and increasing as you go. Speak to your doctor if you're new to exercise. If

you're more active, you might find joy in joining a club, gym, or team.

• Maintain a healthy diet. Following recommended portion sizes can help reduce obesity rates. Obesity is a leading indicator to bigger health concerns such as diabetes and heart disease.

• Socialize. A sedentary lifestyle lacking interaction with friends and family can cause health issues, and isolation can turn into depression. Maintaining current relationships, making new friends, or volunteering can help your mind and mental health perform well.

• Schedule regular check-ups. Don't ignore symptoms.

While you may not need to go to the doctor for every little thing, be aware of your body and make mention of new or worsening symptoms.

Many diseases can be prevented, or treated, when caught early if you remain diligent about your health.

Take medications and vitamins/supplements as prescribed in order to ensure you are feeling your best.

It's never too late to start something new.

You may surprise yourself with the ability to adapt to new changes.

Remaining active and engaged is the best gift you can give yourself.

Staying physically and mentally active, and nurturing social connections with friends and family, are all part of the bigger picture in helping to keep your mind and body well.

Tioga County Courier 9/7/22, ^(9/11/22) Also noted in Courier Chronicle

Public Notice

Veolia Customers in Owego and Nichol

Veolia recently updated its Emergency Response Plan in coordination with the Tioga County Department of Health.

Members of the public who would like to review and/or comment on the proposed plan may do so Monday through Friday (excluding holidays) between 8 a.m. and 4 p.m. at the Veolia office located at 128 North Street in Owego.

For more information, please contact Veolia at (800) 694-7512 or the Tioga County Department of Health at (607) 687-8600.

Owego Kennysaver 9/11/22

POLIO: Now vs Then

What is Polio?

A virus that affects the nervous system causing muscle weakness and in severe cases, paralysis or death. Polio is a serious, life-threatening disease with no cure, but it can be prevented through vaccination.

Polio Vaccination

Then (prior to 2000)

Oral Polio Vaccine

Contains live, weakened strains of poliovirus

Now (after 2000)

Injected Polio Vaccine

Contains inactivated poliovirus

- Unlike polio outbreaks in the 1950s, today's outbreaks are primarily from Vaccine-Derived Poliovirus (VDPV).
- VDPV is a strain related to the live, weakened virus found in the oral polio vaccine. When VDPV is able to circulate in under or unimmunized populations, the weakened virus can return to a form that causes illness and paralysis.
- While the live vaccine was safe, the inactivated poliovirus vaccine has been used exclusively since 2000 to protect against paralytic disease from any type of poliovirus, including VDPV.

Why are we seeing cases of polio in 2022 and who is most at risk?

Polio outbreaks are most commonly a result of areas with low vaccination rates. However, because live vaccines have not been used since 2000 and the majority of Americans are vaccinated, it is unlikely that any outbreak would become widespread in the United States.

Populations most at-risk for polio infection include those who have not been vaccinated against polio, or are under vaccinated. This primarily affects children under the age of 5.

Prevention

Stay up-to-date on vaccinations

Don't delay routine well-child visits

Adults - routinely visit your primary care provider

10 ESSENTIAL ITEMS

Building an Emergency Preparedness Kit

1 WATER

Have one gallon per person, per day to use for drinking, hygiene and cleaning as needed.

2 FOOD

Have a two week supply of food per person that requires no refrigeration, preparation, or cooking.

3 CAN OPENER

Make sure you have a manual can opener. (You can also purchase items that have a pull-top opening).

4 MEDICATIONS

Collect one month's worth of any prescription medicines you are taking. Include non-prescription fever/pain reliever, antacids, anti-diarrheal items, etc., in your stockpile.

5 PERSONAL CARE ITEMS

Collect the basics like soap, toilet paper, toothbrush, hand sanitizer, cleaning supplies, bleach, garbage bags, and feminine products.

6 FLASHLIGHT

Keep a bright flashlight in case there is no electrical power. Consider getting a lantern-style light for hands-free use.

RADIO 7

Have a battery-powered radio for listening to news and weather. Consider buying a crank-operated or solar-powered radio.

CLOTHES 8

Collect extra per person and consider packing blankets, rain gear and outdoor gear.

FIRST AID 9

Include basics such as antiseptic, gloves, a variety of bandage sizes, thermometer, and protective masks.

IMPORTANT DOCUMENTS 10

Collect copies of driver licenses, social security cards, birth certificates, mortgage papers, insurance policies, etc.; keep electronic copies on a flashdrive.

Once you've collected these items, consider the unique needs of your family/household, such as pets, seniors, or members that have medical needs.

Learn more at ready.gov/kit

SEPTEMBER IS BABY SAFETY MONTH

SAFE SLEEP.

A firm mattress and fitted sheet are all you need for your baby's crib. Remove blankets and toys from the crib and use a sleep sack on colder nights.

CAR SEAT.

Arrange safe transport for baby by making sure they are in the correct car seat. Schedule a **FREE** car seat check appointment with Tioga County Public Health 607-687-8612.

FURNITURE PLACEMENT.

Place your baby's crib and other furniture away from windows to avoid falls or strangulation. Your baby is safer without any strings or cords within reach.

ALARMS.

Install working smoke alarm AND a carbon monoxide alarm on every level of your home, and in all sleeping areas. This is an important tip for not just baby safety, but family safety as well. Please test the alarms regularly to make sure they work.

For more safety tips and information visit www.safekids.org

TIOGA COUNTY RABIES VACCINATION CLINIC

SEPTEMBER 8, 2022

5:30pm - 7:30pm

RAWLEY PARK

13334 Rt. 38, Richford, NY 13835

PRE-REGISTRATION IS REQUIRED!
\$10 Suggested Donation

Dogs, cats, and ferrets are welcome. All animals must be at least 3 months old. Vaccination is no charge, donations are greatly appreciated. Dogs must be on a leash. If your dog is aggressive, please bring a muzzle. Cats and ferrets must be in a carrier. One per carrier, please. Bring proof of prior rabies shots, if available. No residency restrictions. If you have multiple animals, please bring a friend or a family member to help.

Scan the QR Code or visit our website ph.tiogacountyny.gov to register!

TIOGA COUNTY CHILD SAFETY SEAT CHECK EVENT!

Thursday, September 22, 2022
2:30pm - 5:30pm

Health & Human Services Building
1062 State Route 38, Owego, NY 13827

Have your child's seat checked for correct installation and fit for your child by a CPS Technician. Replacement seats available for qualifying individuals!

Questions? Please Call Laura at 607-687-8619

Program funded by grants from The Community Foundation of South Central NY and Visions Federal Credit Union.

WHAT THE HEALTH!?

Child Passenger Safety Week is September 18 - 24

In 2019, more than 85% of the car seats checked in Tioga County were installed incorrectly, used incorrectly, or they were not the appropriate seat for the child!

Tioga County Public Health will be holding a Car Seat Check Event during Child Passenger Safety Week!

This is a FREE event.
Car seats can be checked for anybody, and free replacement seats are available for qualifying individuals!

September 22nd
2:30 - 5:30pm
Health & Human Services Building
1062 State Route 38, Owego NY 13827

The Tioga County Department of Mental Hygiene provides 24-hour a day crisis coverage for those who are experiencing a crisis situation. This service is primarily a phone service, but same-day appointments may be available in an emergency situation.

Day Time Phone Number:

607-687-4000

After Hours Phone Number:

DON'T DRIVE HIGH

Driving under the influence of cannabis is ILLEGAL!
Marijuana SLOWS motor coordination & other skills needed to safely drive.

If you feel different, you drive different
 Don't take the chance of harming yourself or others. If you are high or impaired, or if you are unsure - STAY PUT!

Multiple studies have shown that cannabis impairs critical abilities needed to drive safely, resulting in:

- Slowed reaction time.
- Impaired cognitive performance.
- Relaxed inhibitions.
- Altered perception of time & distance.
- Decreased & divided attention.
- Distractions: forgetting the road and staying in the correct lane.
- Impaired cognitive skills: route planning, decision making, risk taking.

Marijuana is legal in NYS, however drivers CAN NOT:
Consume cannabis while operating a motor vehicle.

Burn cannabis in the car - this applies to anyone in the car, not just the driver.

Cross state borders with cannabis in your possession.

Safety Tips

- Always get a ride when using cannabis
- Remember - getting high impairs your decision making
- If driving with cannabis in your vehicle, keep it in a closed container locked in your glove box or trunk

Important Considerations: Alcohol vs Marijuana

Unlike alcohol, there is no acceptable limit of THC found in the blood.

If any THC is found in your blood while you were driving, you can be penalized.

You cannot determine when cannabis no longer affects your ability to drive. The duration of impairing effects can vary on a number of factors, making planning on when it is "safe to drive" dangerous.

TEST FOR LEAD AT AGES 1 AND 2!

LEAD POISONING CAN CAUSE LIFELONG HEALTH PROBLEMS

"Test for Lead" Billboard

"LEAD" Billboard

"Driving High" Billboard

**COUNTY OF TIOGA
EXECUTIVE PROCLAMATION**

WHEREAS: Lead poisoning is a serious, permanent condition that can lead to medical ailments, stunted physical and mental growth, behavioral problems, and developmental delays in children; and

WHEREAS: Lead poisoned children have increased medical costs, educational needs and increased risk for criminal behavior as adults; and

WHEREAS: The goal of New York State's Healthy People 2030 is to reduce blood lead levels in children; and

WHEREAS: New York State Public Health Law states that all one and two year olds be tested for lead levels to identify poisoned children; and

WHEREAS: Tioga County Public Health works with medical providers and parents to advocate child lead testing to reduce the risk of exposure to lead in the home; and

WHEREAS: Between 2019-2021 Tioga County Public Health provided case management and environmental health services to 30 children with elevated blood lead levels; and

WHEREAS: Lead poisoning is completely preventable by knowing and eliminating all possible lead sources children may have access to; therefore

The TIOGA COUNTY LEGISLATURE, County of Tioga, does hereby proclaim the week of October 23-29, 2022 as

LEAD POISONING PREVENTION WEEK

and urges all residents to take steps to educate themselves, their families, and the community about the importance of lead poisoning prevention.

DATED: October 11, 2022

MARTHA SAUERBREY, CHAIR
TIOGA COUNTY LEGISLATURE
