**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

**Determination of Significance - Type 1 and Unlisted Actions**

Identify portions of EAF completed for this Project:    Part 1            Part 2            Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Village of Owego Planning Board \_\_\_\_\_ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

### Site Plan Review:

Pursuant to Chapter 195 Article XXII Section 139 of the Village of Owego Zoning Code; All permitted uses in zoning districts defined under the Village Zoning Code as Article XIA, require site plan approval by the Village of Owego Planning Board before a building permit is issued for the alteration or construction of any building. Upon full review for sufficiency and completeness of the application by the Code Enforcement Officer, the application is submitted to the Village Planning Board for review and is also subject to a public hearing.

### Parking Waiver:

Pursuant to Chapter 195 Article XVIII Section 195-112.C of the Village of Owego Zoning Code, Mr. Nelson has requested a waiver from the off-street parking requirements of Section 195-112.A and B.

### Area Variances:

Pursuant to Chapter 195 Article XVIII Section 113 Subsection A of the Village of Owego Zoning Code, Mr. Nelson has requested a variance to allow for the businesses in the proposed building to utilize public loading spaces, in lieu of providing each business use with a minimum of one off-street loading space at least 12 feet in width and 40 feet in length.

### Special Use Permit:

Pursuant to Chapter 195 Article VII Section 32 Subsections A-D of the Village of Owego Zoning Code, Mr. Nelson has requested a special use permit to infill the aforementioned property located in FEMA Flood Zone AE (1.0% Annual Chance Flood Hazard) with a new construction 13,600 SF mixed-use development building.

## BACKGROUND

Mr. Bruce Nelson, with Nelson Development Group, LLC as consulting developer, is proposing the new construction of the Gateway Building in the Village of Owego. The Gateway Building will be constructed on 0.09 and 0.03 acre parcels respectively that will be purchased via an option to purchase agreement that Mr. Nelson has in place with the current owners, Owego Marketplace Inc. d/b/a Historic Owego Marketplace.

The proposed project will reconstruct a building located at 200-204 Front Street, previously destroyed by fire in July of 2000. This property will be in-filled with a 13,600 SF new construction mixed-use development building. The building façade will be in keeping with the historic storefront design of the Village's commercial district, and has been approved by NYSHPO, as well as, OHPC, contingent on receipt of the final construction drawings.

- 1st Floor – (4) Storefront Retail Incubators (11' wide x 30' deep), (2) Retail/Office Spaces, Public Bathrooms, Patio/Riverwalk Overlook
- 2nd Floor – (2) 2-Bedroom Apartments, (2) 2-Bedroom Apartments w/ overlook patios
- 3rd Floor – (2) 2-Bedroom Apartments, (2) 2-Bedroom Apartments w/ overlook patios.
- Roof Top - Common area for residents, Patio
- Basement - Unfinished Floor Area, Tenant Storage, Patio Access

The proposed Gateway Project is consistent with the Master Plan Village of Owego 2003:

- Construct new housing at higher densities.
- Make affordable housing and market variety a component of the economic development strategy for the village in order to attract and retain businesses.

It is also consistent with the Village of Owego Comprehensive Plan 2013:

Strategy DG-4, "to encourage appropriate infill development at 200-204 Front Street," as well as, the Village's goal to, "attract market rate mixed-income developments that promote stable, economically healthy neighborhoods."

"The Village feels that improving the conditions of the housing stock, increasing the overall housing values, and establishing mixed income housing developments will advance the housing stock, making the Village more appealing to a diverse array of visitors, potential residents, and current residents." And, "Encourage construction of new and rehabilitated housing at higher densities in targeted areas of the Village, following the guidance of the future land use map."

## Findings

### Site Plan Review:

Upon review and discussion of the submitted site plan and all supporting documentation submitted the Planning Board found that the following objectives were met:

- (1) Harmonious relationship between proposed uses and existing adjacent uses.
- (2) Maximum safety of vehicular circulation between the site and the street network.

(3) Maximum adequacy of interior circulation, parking and loading facilities with particular attention to vehicular and pedestrian safety.

(4) Adequacy of landscaping and setbacks in regard to achieving maximum compatibility and protection to an adjacent residential district.

The property will be in-filled with a 13,600 SF new construction, three-story mixed-use development building. Each floor will be 4,400 square feet. The first floor will have six retail incubator/office spaces to encourage commercial development in the downtown area, and the two upper floors will have eight quality residential rental units. The building facade has been approved by NYSHPO, as well as, OHPC, contingent on receipt of the final construction drawings. The project will connect to all existing utilities including municipal water and sewer, and NYSEG electric and natural gas. The rear of the building will be landscaped with a rain garden, that runoff from downspouts will drain into.

**Demolition:** The original foundation of the previous building that was destroyed by fire in 2000, and the existing decking will need to be deconstructed, prior to construction. As much as is possible, the existing material will be re-used.

**Mechanical Systems:** All mechanical systems will be installed new, with state of the art high efficiency units (individually metered). Separation of utilities between the residential and non-residential components of the project is included in the project design.

**Energy Efficiency:** All electrical and heating and air conditioning systems will be new. High efficiency lighting and electrical appliances will also be installed.

**Handicapped Accessibility:** Retail stores, bathrooms and apartments will be handicapped accessible from the street level.

**Proposed Signs/Lighting:** There will be a painted wooden signs will be provided for each business, all with lit externally. The only other lighting will be a wall-mounted recessed, downward-directed light above the front entrance.

**Hours of Operation:** The hours of operation during construction will be Monday –Friday 7:00 AM – 5:00 PM. Once the building is operational, the hours of operation for the commercial space will be set by the individual tenants, however, it is anticipated that the hours of operation will typically be within the range of Sunday-Saturday 9:00 AM – 8:00 PM.

**Employees:** There will be 15 construction jobs created with this proposed project. Once the building is operational there will be approximately 9 full-time jobs created. Mr. Nelson estimates there will be one employee for each available space (6), plus half of the units will also have an additional employee (3). Mr. Nelson will also have a part-time manager and part-time maintenance worker that will maintain the property.

**Traffic Type:** During construction Mr. Nelson would arrange for off-site parking for construction vehicles, and only occupy the parking area in front of the building. The sidewalk will remain open under scaffolding, and a small window will allow a “peek” of the construction activity. Monthly open houses to encourage community involvement and interest will also benefit neighboring businesses with increased foot traffic.

Once the building is operational it is estimated that pedestrian foot traffic will increase due to consumer interest in the new commercial spaces. Automobile traffic will also increase nominally due to the tenants occupying the commercial and residential units.

Overall, this project will complete the historical row of buildings on Front Street, called RiverRow, and will provide not only more apartment living compliant with HUD requirements, but will also house up to six retail and office businesses, which will also contribute to the local economy.

Parking Waiver:

The Village Zoning Code requires off-street parking spaces to be provided depending upon the type of use proposed and the building's gross floor area. Due to the nature of the downtown area, Mr. Nelson seeks to use public parking spaces in lieu of providing additional off-street parking. This is consistent with the practice of other businesses in the downtown central business district.

Area Variances:

A front yard variance is requested for the proposed building. The Village Code requires business structures in the CBA District to have a front yard of 15 feet, when the CBA District abuts on any residential district. The proposed project will be located in the Village's downtown historic district. Due to the nature of the structures here, Mr. Nelson's requested variance seeks to conform with the yard appearances and character of the historic downtown commercial district.

An off-street loading space variance is also requested for the proposed building. The Village Code requires that each business use shall be provided with a minimum of one off-street loading space at least 12 feet in width and 40 feet in length. The proposed project is located in the Village's downtown historic district. Due to the nature of the downtown area, Mr. Nelson's requested variance seeks to utilize public loading spaces, in lieu of providing each business use with a minimum of one off-street loading space. The requested variance is consistent with the practice of other businesses in the downtown central business district.

Special Use Permit:

A special use permit is requested to construct the proposed building in an area that is subject to flooding. The Village Code requires that an applicant comply with Chapter 195 Article VII Section 32 Subsections A-D. The proposed project will comply with each of these elements. The areas of special flood hazard for the proposed project located in the Village of Owego (Community Number 360840), is identified and defined on the FEMA Flood Insurance Rate Map Panel Number 36107C0382E. The base flood elevation (BFE) is identified as 814 feet. The first floor of the proposed building will be constructed 2.5 feet higher (816.5 feet) than the identified BFE. Additionally, per Mr. Nelson, there will be no tanks of liquid fuel or any other combustible material stored at the site, and tenants will not be permitted to store tanks of liquid fuel or any other combustible material either.
